EDUCATION

BE Computer Systems Engineering | Mehran University of Engineering & Technology *Nov 2021 – Nov 2025*

KEY SKILLS

QA & Testing: Manual Testing (Functional, Regression, Smoke, Sanity, E2E, UAT, Exploratory, Ad-Hoc), Test Case Design, Defect Lifecycle, Bug Reporting, SDLC & STLC, RBAC Verification, Requirements Traceability Matrix, Test Documentation
Tools: JIRA, Git, GitHub, Postman, VS Code, Google Lighthouse, Browser DevTools, Excel/Google Sheets, Claude
AI & Dev: Prompt Engineering, Python, RAG, API Integration, Hugging Face, Google Colab, Streamlit, Replit

WORK EXPERIENCE

Artificial Intelligence Intern | YOC – YourOnlineConversation®, Pakistan *Jan 2026 – Apr 2026*

- Designed and executed functional & regression test strategies for 2 CRM systems (Upsell CRM, Umrah Travel CRM), identifying 15+ critical defects including revenue miscalculations, duplicate booking logs, and RBAC permission overrides.
- Built a domain-specific RAG chatbot processing 27 JSON package files and a 60,000+ row variation CSV, reducing hallucinations by configuring semantic guardrails and Cosine Similarity vector search (all-MiniLM-L6-v2).
- Conducted latency and accuracy stress-tests, documenting LLM boundary conditions and compiling professional bug reports shared in technical replication meetings with developers.
- Delivered full QA and AI development deliverables autonomously across a 1-month fully remote phase testing CRM workflows, building and iterating the RAG chatbot, capturing defect evidence, and leading developer sync meetings without on-site supervision.

Software Testing Intern | GCS (Pvt.) Ltd. *Jun 2025 – Jul 2025*

- Tracked 20+ active defect lifecycles in JIRA, bridging QA and dev teams to verify resolved tickets matched live workflow states, cutting re-open rate on sprint closures.
- Performed smoke & sanity testing post-deployment on a Call Management System, validating core user pathways and isolating UI alignment anomalies in an AI-Based Attendance Management System.

Web Developer Intern | Pakistan Engineers Forum (PEF) – MUET *Apr 2025 – May 2025*

- Built a responsive web prototype (HTML5/CSS3), conducted cross-device UI audits using DevTools, raising Google Lighthouse performance score from 70% to 90%+ via AI-assisted code optimization.

PROJECTS

Non-Invasive Blood Pressure Prediction (FYP) – *Python, TensorFlow, Keras, Flutter, Django REST*

- Achieved AAMI-standard blood pressure prediction accuracy (error < ±5 mmHg), as measured by model evaluation against Omron SpO2 and BP sensor ground truth, by training and comparing CNN, ResNet, and ConvLSTM architectures on facial video streams.
- Delivered a fully deployable cross-platform health app, as measured by end-to-end camera-to-prediction latency, by integrating the top-performing model into a Flutter mobile app via Django REST API with a real-time OpenCV preprocessing pipeline.

SkillTek Web Portal - QA Bug Audit & Defect Documentation – *Ad-Hoc & Exploratory Testing, Functional Audit*

- Executed rapid ad-hoc and exploratory functional QA testing across the Admin Portal, Teacher Portal, and Public Website, and identified 8 critical defects spanning business logic flaws, missing input validation, data duplication, and UI safety gaps including assignment creation with 0 marks, future attendance recording, duplicate student CNIC enrollments, and instant record deletion without confirmation..

AI Email Generator – *Python, Groq API*

- Developed an AI-powered email generator enabling users to create professional emails based on email type, recipient, purpose, key points, tone, and length, and improved AI-generated email reliability by identifying and resolving an LLM hallucination defect through response testing, system prompt refinement, and regression testing.

Speech-to-Speech AI Assistant – *Python, Whisper, gTTS, Streamlit*

- Eliminated manual text input entirely, as measured by end-to-end voice response latency across varying audio lengths, by synchronizing OpenAI Whisper transcription with Google Text-to-Speech synthesis in a hands-free Streamlit interface.
